

§ 1145.4

penalties under the CPSA. The Commission also believes that the complexity and formality of the rulemaking proceedings under the FHSA, in contrast to rulemaking proceedings under the CPSA may make it difficult for interested persons to participate.

(b) Extremely flammable contact adhesives and other similar liquid or semi-liquid products in containers over one-half pint that present a risk of burns from explosive vapor ignition and flashback fire shall therefore be regulated under the Consumer Product Safety Act. Such regulation shall include all directly related pending and future rulemaking, as well as all directly related future action on petitions. However, such action shall not include labeling that may be required under the Federal Hazardous Substances Act to address flammability hazards associated with other adhesives not subject to the ban.

[42 FR 63731, Dec. 19, 1977]

§ 1145.4 Consumer patching compounds containing respirable free-form asbestos; risk of cancer associated with inhalation of asbestos fibers.

(a) The Commission finds that it is in the public interest to regulate the risk of cancer associated with inhalation of asbestos fibers from consumer patching compounds containing respirable free-form asbestos under the Consumer Product Safety Act (CPSA) rather than under the Federal Hazardous Substances Act (FHSA) because of the desirability of avoiding possibly lengthy resource-consuming, inefficient rulemaking proceedings under the FHSA and because of the availability of civil penalties under the CPSA for knowing noncompliance.

(b) Therefore, consumer patching compounds containing respirable free-form asbestos are regulated under CPSA.

[42 FR 63354, Dec. 15, 1977]

§ 1145.5 Emberizing materials (embers and ash) containing respirable free-form asbestos; risk of cancer associated with inhalation of asbestos fibers.

(a) The Commission finds that it is in the public interest to regulate the risk

16 CFR Ch. II (1–1–12 Edition)

of cancer associated with inhalation of asbestos fibers from artificial emberizing materials (embers and ash) containing respirable free-form asbestos under the Consumer Product Safety Act (CPSA) rather than under the Federal Hazardous Substances Act (FHSA) because of the desirability of avoiding possibly lengthy, resource-consuming, inefficient rulemaking proceedings under the FHSA, and because of the availability of civil penalties under the CPSA for knowing noncompliance.

(b) Therefore, artificial emberizing materials (embers and ash) containing respirable free-form asbestos are regulated under the CPSA.

§§ 1145.9–1145.15 [Reserved]

§ 1145.16 Lighters that are intended for igniting smoking materials and that can be operated by children; risks of death or injury.

(a) The Commission finds that it is in the public interest to regulate under the Consumer Product Safety Act any risks of injury associated with the fact that lighters intended for igniting smoking materials can be operated by young children, rather than regulate such risks under the Federal Hazardous Substances Act or the Poison Prevention Packaging Act of 1970.

(b) Therefore, if the Commission finds regulation to be necessary, risks of death or injury that are associated with lighters that are intended for igniting smoking materials, where such risks exist because the lighters can be operated by young children, shall be regulated under one or more provisions of the Consumer Product Safety Act. Other risks associated with such lighters, and that are based solely on the fact that the lighters contain a hazardous substance, shall continue to be regulated under the Federal Hazardous Substances Act.

[58 FR 37556, July 12, 1993]

§ 1145.17 Multi-purpose lighters that can be operated by children; risks of death or injury.

(a) The Commission finds that it is in the public interest to regulate under the Consumer Product Safety Act any risks of injury associated with the fact

Consumer Product Safety Commission

§ 1200.2

that multi-purpose lighters can be operated by young children, rather than to regulate such risks under the Federal Hazardous Substances Act or the Poison Prevention Packaging Act of 1970.

(b) Therefore, if the Commission finds regulation to be necessary, risks of death or injury that are associated with multi-purpose lighters because the lighters can be operated by young children shall be regulated under one or more provisions of the Consumer Product Safety Act. Other risks that are associated with such lighters, and that are based solely on the fact that the lighters contain a hazardous substance, shall continue to be regulated under the Federal Hazardous Substances Act.

[64 FR 71884, Dec. 22, 1999]

PART 1200—DEFINITION OF CHILDREN'S PRODUCT UNDER THE CONSUMER PRODUCT SAFETY ACT

Sec.

1200.1 Purpose.

1200.2 Definition of children's product.

AUTHORITY: 15 U.S.C. 2052(2).

SOURCE: 75 FR 63077, Oct. 14, 2010, unless otherwise noted.

§ 1200.1 Purpose.

This part provides guidance on the definition of children's product and the factors the Commission will consider when making determinations regarding children's products as set forth under 15 U.S.C. 2052(2).

§ 1200.2 Definition of children's product.

(a) *Definition of "Children's Product"*—(1) Under section 3(a)(2) of the Consumer Product Safety Act (CPSA), a children's product means a consumer product designed or intended primarily for children 12 years of age or younger. The term "designed or intended primarily" applies to those consumer products mainly for children 12 years old or younger. Whether a product is primarily intended for children 12 years of age or younger is determined by considering the four specified statutory factors. These factors are:

(i) A statement by a manufacturer about the intended use of such product, including a label on such product if such statement is reasonable.

(ii) Whether the product is represented in its packaging, display, promotion, or advertising as appropriate for use by children 12 years of age or younger.

(iii) Whether the product is commonly recognized by consumers as being intended for use by a child 12 years of age or younger.

(iv) The Age Determination Guidelines issued by the Commission staff in September 2002 and any successor to such guidelines.

(2) The examples discussed herein may also be illustrative in making such determinations; however, the determination of whether a product meets the definition of a children's product depends on factual information that may be unique to each product and, therefore, would need to be made on a case-by-case basis. The term "for use" by children 12 years or younger generally means that children will physically interact with such products based on the reasonably foreseeable use of such product. Toys and articles that are subject to the small parts regulations at 16 CFR Part 1501 and in ASTM F963 would fall within the definition of children's product since they are intended for children 12 years of age or younger. Toys and other articles intended for children up to 96 months (8 years old) that are subject to the requirements at 16 CFR 1500.48 through 1500.49 and 16 CFR 1500.50 through 1500.53 would similarly fall within the definition of children's product given their age grading for these other regulations. Therefore, a manufacturer could reasonably conclude on the basis of the age grading for these other regulations that its product also must comply with all requirements applicable to children's products including, but not limited to, those under the Federal Hazardous Substances Act, ASTM F963, "Standard Consumer Safety Specification for Toy Safety," and the Consumer Product Safety Improvement Act of 2008.

(b) *Definition of "General Use Product"*—(1) A general use product means
